

SafeGuard Suite By LDC

End-to-end security & compliance

Increasing data breaches and security threats can leave companies vulnerable to sensitive information leakage, compliance violations and huge financial risk. Based on a thorough analysis carried out by Security Intelligence, the average cost of a data breach in 2019 was \$3.92 million. Moreover, in the first six months of 2019 alone, data breaches exposed a whopping 4.1 billion records, up 54 percent compared to the same time in the previous year.

Ensuring the provisioning of robust technology infrastructures and the thorough adherence to compliant business practices are a fundamental requirement to circumvent unfavorable financial risks and guarantee sustainable business growth.

SafeGuard Suite By LDC

Navigate the complexities of today's cyber crime transgressions with SafeGuard Suite By LDC. Built on robust foundations, SafeGuard Suite By LDC is an enterprise-grade, end-to-end, security and compliance solution that leverages Microsoft's infamous M365 Security & compliance features. The SafeGuard Suite is a powerful all-inclusive security solution and technology suite that contains SafeGuard Audits by LDC, data security & privacy tools, network infrastructure security, SOC services and threat protection analytics.

From preliminary security and compliance assessments to extensive audits LDC uses its proven security processes to help organizations prove compliance, combat threats and run operations with peace of mind.

1 SafeGuard Audit

Security strategy analysis, threat advisory, compliance assessments and systematic evaluations carried out by professional data and infrastructure analysts.

2 Data Security & Privacy

Covering your data security and privacy needs from implementing multi-factor authentication (MFA), encrypted email, DLP policies and identity protection, to executing GDPR compliance measures and procedures on top of your existing systems.

3 Cross Cloud Protection & Infrastructure Security

Protect every layer of your applications and secure your custom apps in the cloud with Application Security services. Continuously monitor cross-cloud resources such as virtual machines, networks, applications, and data services.

4 SOC Services

24/7/365 security monitoring and ongoing compliance checks carried out by security experts providing you with actionable intelligence allowing your IT teams to resolve internal issues quickly.

5 Threat Protection Analytics

Advanced analytics link massive amounts of threat intelligence and security data to provide you unparalleled threat protection and detection.
